Environmental Emergency!

Everyone knows that the planet is in danger. Some people think there is nothing we can do about this but that's just not true. If we all do a few, small things every day, we can make a real difference.

Here are some ideas for you to try:

Use less water. Turn the tap off when you brush your teeth or in the shower when you wash your hair. You'll use less water and the water bill will be cheaper so your parents will be happy too!

Use less electricity. When you finish watching TV, turn it off. Turn your mobile off at night to save the battery. After you charge your phone or computer, disconnect them. When you leave a room, switch the light off. It is simple, easy and green.

Eat less meat and fish. We all enjoy a hamburger but we don't need to eat meat every day. There are other vegetarian alternatives like lentils, chickpeas and vegetables that are healthy, tasty and cheap. If we eat less of these foods, we will help preserve fish stocks in the sea and prevent deforestation (when trees are cut down to make more space for creating cattle farms).

Get moving! Use public transport, walk or cycle to get to school, work or to meet friends. Many car journeys are under 3 km long – a short distance that doesn't need a car. Get some exercise and prevent air pollution at the same time.

Recycle. Use local recycling points to recycle glass, paper and plastic. Remember to organise the recycling at home and wash glass and plastic containers. Reusing materials is another way we can protect our natural resources like trees.

Don't buy bottled water. Take your own reusable water bottle out with you. This saves resources and prevents more rubbish. Did you know there is a giant island of floating plastic in the middle of the Pacific Ocean that will be there for hundreds of years? Plastic doesn't biodegrade (disappear naturally) so it's there for centuries unless we recycle it.

Buy local food products. Why do we buy fresh food from foreign countries that travels to us by plane, when we have a great choice of food grown and produced at home? It is better for the economy, the environment and us. Food that comes from where we live is fresher, too!

Go organic! Food grown without pesticides is more expensive but is safe and natural so it respects the environment and our bodies. Think of all the bees you will save by eating organic... that's a lot of honey and more pollinated flowers and plants, which means more food and nature in the future! So what are you waiting for? Start today! The world isn't getting any cooler ...

- 1 Does the writer think we can make a difference to the environment?

- 2 Why should you turn off the tap when you are brushing your teeth?

- 3 What should you do with your mobile phone at night?

- 4 If we don't eat meat or fish, what are the alternatives?

- 5 Does the writer believe that if your journey is under 3 km it's OK to take the car?

- 6 What can we recycle at recycling points near our homes?

- 7 Why is plastic bad for the environment?

- 8 What are the advantages of eating food produced in your own country?

- 9 What is a disadvantage of organic food?

- 10 Why is it so important for everyone to reduce the use of pesticides?

10 Complete the second sentence so that it means the same as the first. Use no more than three words.

- 1 It's possible it will rain later.
I think it's _____ later.
- 2 He has read three books today. He's still reading.
He's _____ he got up this morning.
- 3 When I was little I went to the park every day.
I _____ to the park every day.
- 4 You don't study and your parents are angry.
Your parents _____ angry if you studied more.
- 5 I am not very good at playing tennis.
I _____ play tennis better.

10

11 Write the story of your favourite band or singer (100 – 120 words).

- how they started out
- how long they have been performing
- how they became successful
- how you found out about them
- some of their songs
- why you like them
- a concert you have been to

[illegible]
