Name: _____ Score: ___ / 50

Reading

1 Read the text then answer the questions 2–8.

Technology on the move

According to recent estimates, the number of mobile phones in existence now exceeds the world's population, which is a truly staggering thought. When considering the developing countries, it comes as no surprise that China leads the table with over 1.25 billion phones. What might be surprising, however, is the fact that there are over 83 million mobile phones in the UK, which has a population of just 63 million.

If you walk around any typical British town or city, you will be struck by the number of shops selling not only mobile phones, but also mobile phone accessories. Who is buying all these phones if everyone already has one? Clearly, the market is bottomless as new models are constantly being launched and snapped up as soon as they appear. Such is the power of advertising that eager consumers will happily spend the night queuing for the latest smartphone so that they can show off to their friends.

Obviously mobile phones are here to stay, but aren't we in danger of allowing them to dominate our lives? Although there are some, mainly rural, areas of the UK where it is hard to get a signal, you will generally be able to make and receive calls whenever you want to, which has led to a 24/7 society, a society in which people feel they need to be available at all times.

For so many people, their mobile phone is their lifeline, their contact with the outside world. It is an extension of who they are, almost an extra limb. It is with them at all times, and I would argue that it is this need to have constant contact that is affecting the way we behave. How often do you use your phone when it is not really good manners to do so?

Of course it is true that life has improved in many ways due to the advances in mobile technology. However, it is also important to remember that the mobile phone is a tool and should not rule the way we live. How about having one day a week that is mobile free? Does that thought appeal to you or horrify you? I, for one, would be in favour.

2 Are the following statements true (T) or false (F)? Use the exact words from the text to justify your answers. (___ / 4)

1 There are more mobile phones in the world than people. ___

_____

2 You can get a good signal everywhere in the UK. ___

_____

3 Answer the questions in your own words. (___ / 4)

1 Why is the number of phones in the UK surprising?

_____

_____

2 What is a 24/7 society?

_____

_____

4 Choose the best answers. (___ / 4)

1 Consumers are ready to buy the latest phones because …
   a they're influenced by the marketing.
   b they want to be better than their friends.
   c it's important to be up-to-date.
   d they need them.

2 The writer suggests that mobile phone technology is making us …
   a more demanding.
   b insecure.
   c less considerate.
   d less reliant on mobile phones.

5 Write a question for which the underlined words are the answer. (___ / 4)

1 My mobile phone is an extension of who I am.

_____

2 There are more mobile phones in China than in any other country.

_____
