Travel and See Nature!

When you plan your next vacation, think about these incredible places around the world!

Yosemite National Park in the US

This park has some of the most amazing natural places in California. You can see forests, mountains and waterfalls. Hiking and climbing are popular. Yosemite has giant sequoias – these are some of the largest trees in the world.

Stonehenge in the UK

Stonehenge is a circle of large stones. Stonehenge is around 5,000 years old, but some objects in this place can be 10,000 years old! Stonehenge is one of the most famous attractions in the UK.

Uluru in Central Australia

Uluru – or Ayers Rock – is a giant rock formation in the Australian desert. It is a very important place to the Australian Aboriginal people. Uluru is very far from cities, and it almost never rains there! People cannot climb Uluru, but they can hike around it.

Which place is the most interesting to you?

Write **Y** (Yosemite), **S** (Stonehenge), or **U** (Uluru).

- 1 It is a popular place in the UK. ____
- 2 There are mountains in this place. ____
- 3 This place is in a desert. ____
- 4 Some of the world's largest trees live there. ____
- 5 This is the driest place to visit. ____

5

6 Write **T** (true) or **F** (false) next to the statements.

- 1 Yosemite National Park is in California. ____
- 2 There are waterfalls in Yosemite National Park. ____
- 3 Stonehenge is 10,000 years old. ____
- 4 Australian Aboriginal people respect Uluru. ____
- 5 You can climb to the top of Uluru. ____
