The keys to creativity

Have you got friends who are extremely creative and imaginative? You know the type of people: perhaps they wear interesting clothes, or they draw really well, or they always seem to be involved in fascinating projects … Do you sometimes think you're a bit dull in comparison? Well, the good news is that you can make your life more dynamic and creative, but it'll take some effort! You're probably stuck in a routine, and you need to change it! Start with some simple things, first. Do you always take the bus to school? Try walking or going by bike! Do you have the same thing for breakfast every day? Now's the time to experiment! You'll be surprised at the difference that a few small changes can make.

Doing sport is another great way to stimulate your creativity. There are several reasons for this. First of all, physical exercise increases the supply of oxygen to your brain, which obviously makes you mentally more active. In addition, like all animals, we need to keep active if we want to function at our best. Doing sport also provides a change of focus, and one of the keys to creativity is doing different things in our free time.

It's often a good idea to take up a completely new hobby, too. For instance, why not start going to a cookery class? Once you learn the basics, cookery is a very creative activity because it lets you try out different combinations of ingredients. Meditation is also an excellent aid to creativity as it calms the mind and makes us more open to fresh ideas.

So, if you want to become more creative, there are plenty of ways to get started! What's more, you'll almost certainly turn out to be much more creative than you thought!
